Coal imports rose 14% to 22 mt in September

New Delhi: The country's coal imports surged 13.54 per cent to 22.05 million tonnes (mt) in September, driven by increased demand ahead of the festival season. Imports in September recorded a notable rise from 19.42 mt during the same month of the previous financial year. Breaking down the numbers, non-coking coal imports stood at 13.90 mt against 13.24 mt in September 2024. Coking coal imports rose to 4.50 mt against 3.39 mt a year ago. ■

Delhi to host India-Chile FTA talks in December

New Delhi: The next round of negotiations between India and Chile on the proposed free trade agreement is expected to be held in December here, an official said. The pact with the South American nation may help India access critical minerals, which are key inputs for electronics, auto, and solar sectors. India and Chile concluded the third round of negotiations for a Comprehensive Economic Partnership Agreement (CEPA) in Santiago. The four-day talks concluded on October 30. ■

With rising rabi demand, govt pushes nano-fertilizers

MIXED REACTION. While most farmers are sceptical, some are experimenting with them

Prabrudatta Mishra
New Delhi

As rabi sowing gathers pace, the government is pushing the use of nano-fertilizers (liquid) to address the growing concerns about supply of conventional (granular) fertilizers.

The fear has been triggered by the simultaneous increase in conventional fertilizer demand and rising acreage this year.

Data show that in the first week of November, sale of urea was 6.18 lakh tonnes compared to 2.58 lt a year ago; of DAP 3.49 lt (1.43 lt); MOP 0.49 lt (0.27 lt) and complex 3.10 lt (1.60 lt). The total area under coverage too has increased 27 per cent to over 130 lakh hectares as of November 10 compared to 102.1h a year ago.

The Agriculture Ministry has stepped in, with Agriculture Secretary Devesh Chaturvedi holding a meeting with stakeholders, including farmers and scientists, to gauge if nano-fertilizers can truly be pushed as an immediate alternative.

FARMERS' FEEDBACK
The feedback from farmers invited to share their experience was mixed. While some

SEED BOOST. IFFCO, which invented nano technology in the crop nutrient, is trying to persuade farmers to get the seed treated with nano fertilizers before it is sown in the field

growers reported benefiting from using nano-urea and nano-DAP, others expressed strong reservations.

Government sources noted a widespread reluctance among farmers to embrace the technology in contrast to the "enthusiasm" observed in countries like the US.

The government is keen to push nano-fertilizers while farmers are reluctant to use them in India.

Government sources told *businessline* that in many countries, including the US, there is enthusiasm about adopting nano technology but in India, farmers remain lukewarm to the idea.

While farmers remain hesitant, fertilizer cooperative IFFCO, which invented the nano technology in the crop nutrient, is trying to per-

sue them to treat the seed with nano-fertilizers before sowing. Lakhbir Singh, a wheat farmer from Patiala district of Punjab, has 45 acres under the crop already sown this year and for the first time he has used treated seeds on one acre.

"My sowing was completed by November 5 and as a trial I have used the treated seed only on 1 acre. The seed DBW 327 has been treated with non-DAP and IFFCO officials guided me in the treatment," Singh told *businessline*.

Since the cost of cultivation is very high, he said, he did not want to take a risk for the entire area and if results would be better, he would consider an expansion.

Sources said that treating wheat seeds with nano-DAP

is a better option than direct application of the fertilizer in the field as the treated seeds when sown would save one fertigation of phosphates and it is same in terms of output.

IFFCO aims to increase sales of nano-DAP, non-urea to 3.75-4.5 crore bottles in the current fiscal from 3.64 crore bottles in FY25.

If that is achieved, it may further revise the target to 6 crore bottles — kharif 2.50 crore bottles and rabi 3.50 crore bottles — in FY 2026-27, said an IFFCO official.

PIVOTAL OPPORTUNITY
However, IFFCO maintains that the integration of nano-fertilizers into the nutrient management framework offers a pivotal opportunity to transform the country's agricultural landscape.

"By promoting higher input efficiency, environmental stewardship and economic viability, nano-fertilizers can play a central role in achieving holistic, resilient, and sustainable crop production systems not only in India but across the global agricultural community. Our goal is to promote the usage and benefits of nano-fertilizers by educating farmers on a large scale as it is a continuous process," said an IFFCO spokesman.

'India, China, Russia may ramp up energy trade in local currencies if \$ turns unstable'

Rishi Ranjan Kala
New Delhi

CAPACITY BOOM. The paper noted that the US is set to dominate global LNG supply growth through the end of the decade, nearly doubling installed capacity by 2030

Emphasising the impact on energy markets due to the US flexing its dollar dominance, the Oxford Institute for Energy Studies (OIES), in a recent paper, projected that countries such as India, China and Russia will increasingly do business leveraging local currencies if the greenback becomes less stable.

The OIES, in a paper on the geopolitics of natural gas, argued that the Donald Trump administration's politicisation of energy is likely to cap market growth, as strategic buyers seek to diminish energy import reliance while instead developing home-grown, decarbonised alternatives.

The paper pointed out that through its dominance of dollar-clearing finance, the US has extraordinary powers to influence global market conditions through the imposition or lifting of unilateral sanctions on consumer countries or other producers, so-called secondary sanctions, especially for those whose energy imports are priced and cleared in US dollars.

The capacity for an unconstrained US administration to impose sanctions outside of the UN framework means the market impact are more likely, it emphasised.

MAJOR PLAYERS

"Several major players in global energy trade including Russia, China, India, and Iran have sought to conduct business in local currencies and avoid US clearing institutions, something that may gather pace especially if the

US dollar and debt markets become less stable.

"This is potentially another factor that undermines international dollar-denominated price benchmarks and market design," it explained.

THE LNG EQUATION

The paper noted that the US is set to dominate global LNG supply growth through the end of the decade, nearly doubling the installed capacity by 2030.

"The Trump administration's aggressive moves to secure and expand markets for its LNG exports as part of its broader foreign policy objectives may, however, undermine the strategic case for LNG with some buyers, politicising the trade in a way that could diminish potential long-term market growth," it added. On the other hand, Qatar — the next largest growth supplier in the new wave — intends to maximise its low-cost LNG portfolio as a purely commercial offer in what is set to become a competitive market as gas prices fall.

One counter-balance to the constrained growth outlook, said OIES, is that lower prices are expected to trigger faster demand growth in sev-

eral Asian markets, where demand may be more price responsive and decarbonisation policy is trumped by price. Besides, the vulnerability of the US LNG sector to rising costs may in fact be one of the drivers for or at least explain the determination of the US government to try and leverage long-term sales into its new trade agreements, the OIES paper said. But that suggests the underlying economics are more fragile amid a prospective downturn in global gas prices, it added.

"Global trade policy also has the potential to alter the trend for US LNG exports over the years of the Trump second term. So far, the imposition of counter-tariffs by China on US LNG has had a relatively minor impact on the global market. But the potential for the US to link its LNG sales to other political actions is significant," OIES anticipated.

SUPPLY CRISES

The paper also highlighted that inter-related global price benchmarks mean supply crises in one region sparks matching price spikes in markets far from the point of disruption.

Ahead of Putin visit, India, Russia take stock of Eurasia FTA talks

Amit Sen
New Delhi

Prime Minister Narendra Modi and Russian President Vladimir Putin are set to meet in December in New Delhi ■ REUTERS

Ahead of Russian President Vladimir Putin's visit to India in December, top officials from the two countries reviewed the progress of the India-Eurasian Economic Union (EAEU) free trade agreement (FTA) talks. The focus was on a "time-bound" pathway for key sectors such as pharmaceuticals, telecom equipment, machinery, leather, automobiles and chemicals.

New Delhi is keen on checking its widening trade deficit with Moscow, which increased to about \$59 billion in FY25, and is hopeful that the proposed FTA with the EAEU bloc, comprising Russia, Belarus, Kazakhstan, Armenia and Kyrgyzstan, will help push imports substantially.

"Commerce Secretary Rajesh Agrawal has reviewed the progress of India-EAEU FTA negotiations in a series of meetings in Moscow," per a Commerce Department statement on Sunday. He met the Minister in charge of Trade of the Eurasian Economic Commission Andrey Slepnev, the Deputy Minister

of Industry and Trade of the Russian Federation Mikhail Yurin, and also addressed a business networking plenary with members of Indian and Russian industry.

With the US tariffs of 50 per cent making it difficult for Indian exporters to send shipments to the country, Russia and other members of the EAEU bloc are promising options for market diversification.

BILATERAL MEETING

"Prime Minister Narendra Modi and Putin, at their bilateral meeting in December, are likely to review the progress made by the two countries towards the target of

\$100-billion bilateral trade by 2030 and also discuss the potential FTA," a source told *businessline*.

In FY25, the bilateral trade was at \$68.69 billion, with India's imports from Russia, mostly crude, valued at \$63.81 billion. India's exports to Russia, on the other hand, were just at \$4.88 billion.

"Both sides discussed a time-bound pathway across key sectors such as pharmaceuticals, telecom equipment, machinery, leather, automobiles and chemicals. Quarterly regulator-to-regulator engagement was agreed upon to address certification requirements, listings of ag-

ricultural and marine businesses, prevention of monopolistic practices and other non-tariff issues," the statement on the Commerce Secretary's meetings underlined.

RECEPTIVE RUSSIA

Putin, too, recently acknowledged the need to address the trade imbalance and asked his officials for suggestions on the most promising

areas to smoothen the imbalance in trade. This included increased procurement of agricultural products and pharmaceuticals from India.

The Russian government is also encouraging business delegations from India in multiple sectors such as processed and packaged food, marine products, beverages, engineering goods, consumer electronics and household goods.

External Affairs Minister Jaishankar to meet Russian counterpart today

Press Trust of India
Moscow

External Affairs Minister S Jaishankar is scheduled to meet his Russian counterpart Sergei Lavrov here on Monday to discuss bilateral ties ahead of President Vladimir Putin's New Delhi visit next month.

According to Russian Foreign Ministry spokeswoman Maria Zakharova, Jaishankar is arriving in Moscow leading an Indian delegation to the meeting of Council of Prime Ministers of the Shanghai Cooperation Organisation (SCO) on Tuesday.

Pakistan, also a member of the SCO, will be represented by Deputy Prime Minister and Foreign Minister Mohammad Ishaq Dar. However, according to sources, there is no provision for his bilateral meeting with Jaishankar.

According to Kremlin sources, Putin will the SCO meet, formally hosted by Russian Prime Minister Mikhail Mishustin. China, Russia, Kazakhstan, Kyrgyzstan, Tajikistan and Uzbekistan are founding members of the SCO, which was later expanded by admitting India, Pakistan, Iran and Belarus as full members.

Consumer grievance portal logs 2.75 lakh users since January launch

Our Bureau
New Delhi

The Department of Consumer Affairs on Sunday said that consumer grievance portal e-Jagriti has registered nearly 2.75 lakh users since its launch on January 1.

The digital grievance redress system was launched to streamline procedures for citizens by reducing paperwork, minimising travel and cutting down physical documentation while strengthening access to NRIs.

"As of November 13, the unified portal has facilitated 1,30,550 case filings and ensured the disposal of 1,27,058 cases, reflecting its

efficiency in strengthening consumer protection across the country," the official statement added.

The portal integrates legacy systems such as OCMS, e-Daakhil, NCDRC CMS and CONFONET into a single, seamless interface.

With its OTP-based registration, e-Jagriti enables even NRIs to file complaints, make digital or offline fee payments, participate in virtual hearings, exchange documents online, and track cases in real time, eliminating the need for physical presence in India.

"As of November 13, a total of 1,30,550 complaints have been lodged nationwide, with high adoption in Gujarat (14,758 cases), Uttar Pradesh (14,050 cases) and Maharashtra (12,484 cases).

The platform's role-based dashboards provide advocates with tools to track cases, upload documents and receive alerts, while judges access digital files, analytics and virtual courtrooms for efficient hearings," the statement added. Meanwhile, 466

NRI complaints have been filed through the platform from countries such as the US (146), the UK (52), the UAE (47), Canada (39), Australia (26) and Germany (18).

AUTOMATED WORKFLOWS

The portal has automated workflows, real-time updates via SMS/email and virtual hearings have contributed to disposal rates exceeding 100 per cent in 10 States and the NCDRC recently.

The portals also have multilingual interfaces and accessibility tools make it user-friendly for diverse demographics.

"The platform has dispatched over 2 lakh SMS alerts and over 12 lakh email notifications, covering key events such as OTP verifications for registration and re-approval or reversion confirmations, successful e-filing acknowledgements, profile security alerts and real-time updates on notices issued," it added.

TODAY'S PICK.

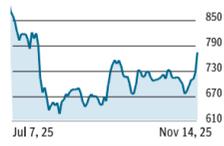

Paras Defence & Space Tech (₹765.90): BUY

Gurumurthy K
bl. research bureau

The short-term outlook is bullish for Paras Defence & Space Technologies. The stock has surged about 13 per cent last week and has closed on a strong note. If this momentum sustains, there are good chances for the share price to go further higher in the coming weeks. Immediate support is at ₹750. Below that, ₹720-700 is the next important support zone. Paras Defence share price can rise to ₹850-₹860 in the coming weeks.

Traders can buy Paras Defence shares now at ₹766. Accumulate on dips at ₹752. Keep the stop-loss at ₹715

Paras Defence and Space
Return -13% ₹ 765 910

initially. Trail the stop-loss up to ₹775 as soon as the stock goes up to ₹790. Revise the stop-loss higher to ₹795 and ₹820 when the share price touches ₹810 and ₹840 respectively. Exit the long positions at ₹855.
