Advent Hotels lists after spin-off from Valor Estate

New Delhi: Advent Hotels International Ltd, which has been demerged from realty firm Valor Estate Ltd, has listed and started trading on BSE and NSE. It now operates two marquee hotels — a 313-key Grand Hyatt-flagged property in Bambolim, Goa and a 171-key Hilton-branded property in Andheri East, Mumbai. The shares got listed at a premium of ₹310 on the BSE and jumped 5 per cent to ₹325.45, which was its upper circuit and also the closing price for Thursday. The discovery price was ₹264.50 per share, as per the BSE data. On the NSE, it was listed at ₹313, at par with the discovery price of ₹312.70. The shares on NSE closed at ₹328.65. ■

Europe's DWS Group to acquire 40% in Nippon Life India AIF Management

CAPITAL GAINS. Both institutions plan to launch passive products for the Indian and UCITS markets

Our Bureau
Mumbai, November 13

Nippon Life India Asset Management and Deutsche Bank Group's DWS, a European asset manager, have signed a memorandum of understanding for strategic collaboration in the domestic market spanning alternatives, passive and active assets.

According to the MoU, DWS plans to acquire a 40 per cent stake in Nippon Life India AIF Management. NIAIF has raised a commitment of about \$1 billion and has an established track record of 10 years.

NAMI and DWS also plan to jointly launch passive products for the Indian and UCITS markets, leveraging

each party's strong passive capabilities across the entire value chain.

DISTRIBUTION PACT
NAMI aims for a global distribution arrangement to develop and distribute actively managed mutual funds with India-focused strategies through DWS' global distribution network.

NIAIF has a comprehensive Alternatives product suite across private credit, listed equities, real estate and venture capital. With the proposed joint venture, it plans to further expand its product suite and coverage to offshore investors through DWS' global reach.

While Nippon Life India Asset Management has \$85 billion in Assets under Management and a market cap of

“Alternatives are the next big opportunity in India's asset management landscape and the collaboration will further strengthen the Alternatives platform

SUNDEEP SIKKA
ED & CEO, Nippon Life India Asset Management

\$6 billion, DWS Group has \$1,233 billion in AUM and a market cap of \$12 billion.

Introduced in 2012, AIF structured funds in India have received \$171 billion in gross capital commitments, and are projected to expand

at 32 per cent CAGR, reaching about \$693 billion over the next five years.

Sundeep Sikka, ED & CEO, Nippon Life India Asset Management, said alternatives are the next big opportunity in India's asset

management landscape and the collaboration will further strengthen the Alternatives platform.

EYEBING KEY MARKETS

In addition to Japan, the partnership opens other key global markets for NAMI and positions it as a truly global asset manager, he said. Stefan Hoops, CEO, DWS, said India is one of the core growth markets for global asset managers for the next decades and has long been a strategic ambition for DWS. The envisaged agreements tackle priorities, including the target to drive growth in Alternatives and Passive, and leverage strong partnerships in Asia, he said. DWS is part of Deutsche Bank, but operates as a separately listed asset management company.

TODAY'S PICK.

Welspun Living (₹136.65): BUY

Gurumurthy K
bl. research Bureau

The short-term outlook is bullish for Welspun Living. The stock has very good support around ₹134, which can be tested in the near term. Lower support is around ₹130. However, we can expect the stock to sustain above ₹134 itself. The 21-Day Moving Average (DMA) is on the verge of making a bullish cross over the 200-DMA. This also strengthens the bullish case and indicates that the downside could be limited. Welspun Living's share price can rise to ₹155 in the coming weeks.

Traders can buy Welspun Living now at ₹137. Accumulate on dips at ₹135. Keep the

stop-loss at ₹128. Trail the stop-loss up to ₹140 as soon as the stock goes up to ₹144. Revise the stop-loss up to ₹145 and ₹148 when the price touches ₹147 and ₹151, respectively. Exit the longs at ₹154.

Note: The recommendations are based on technical analysis. There is a risk of loss in trading.

FPI stake in India Inc falls to 15-yr low; domestic investors tighten hold

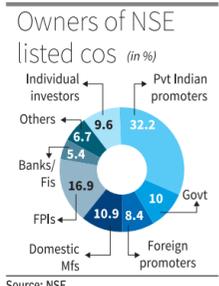

Akshata Gorde
Mumbai

Foreign portfolio investors' (FPIs) ownership in NSE-listed companies fell to a 15-year low of 16.9 per cent in the September 2025 quarter, extending a decline that began in early 2023, according to NSE's latest India Ownership Tracker.

Except for marginal upticks for two quarters, FPI shareholding has been steadily falling since March 2023, due to volatility in global capital flows and profit-booking by foreign investors. In the first half of FY26 alone, FPI share fell by 63 basis points, with outflows of \$8.7 billion during the September quarter.

In value terms, FPI holdings slipped 5.1 per cent quarter-on-quarter to ₹75.2 lakh crore, even as they have grown at an annualised pace of 17 per cent over the past two decades — slightly ahead of the 16.1 per cent growth in overall market capitalisation.

FPI ownership in the Nifty 50 and Nifty 500 indices also dropped by 43 bps and 46 bps, respectively, to 24.1 per cent and 18 per cent — both at their lowest levels in over 13 years. The decline was broad-based, with continued selling in consumption and commodity-oriented sectors such as FMCG, energy and materials. FPIs remained overweight on financials and communication services but turned cautious on IT and

maintained an underweight stance on industrials.

DOMESTIC MFS LEAD
In contrast, domestic mutual funds (DMFs) continued to gain ground, marking their ninth consecutive quarterly rise in shareholding. Backed

FPIs remained overweight on financials, communication services; turned cautious on IT; underweight on industrials

by record equity inflows of ₹1.64 lakh crore in Q2 FY26, mutual funds lifted their ownership in NSE-listed companies to a new peak of 10.9 per cent.

DMFs' share in the Nifty 50 index rose to 13.5 per cent and 11.4 per cent in the Nifty 500 index. Monthly systematic investment plan (SIP) inflows averaged ₹28,697

crore in the quarter, up 6.8 per cent sequentially and 20.6 per cent year-on-year.

The continued strength of domestic flows pushed overall domestic institutional investor (DII) ownership — which includes mutual funds, insurers, banks and other financial institutions — to 18.7 per cent, surpassing FPI share for the fourth consecutive quarter. The DII-FPI ownership gap, which stood at minus 12 percentage points in September 2014, has now decisively turned in favour of domestic investors.

RETAIL SHARE STABLE
The share of individual investors in NSE-listed companies remained steady at 9.6 per cent, within the 9.5–

9.8 per cent range of the past nine quarters. Retail inflows revived during the quarter, totalling ₹20,469 crore. Meanwhile, their ownership in companies outside the top 10 per cent by market capitalisation rose 48 bps to a 19-year high of 16.7 per cent, indicating a growing interest in mid- and small-cap stocks.

Promoter ownership stayed largely unchanged at 50.1 per cent, with a slight rise in foreign promoter stakes offset by a decline among private Indian promoters. In the Nifty 50, however, promoter share slipped for the sixth straight quarter to 40 per cent, the lowest in 23 years. Government ownership eased 10 bps to 10 per cent, extending a steady decline over the past year

SEBI proposes pledged pre-IPO shares, simpler IPO disclosure format

Our Bureau
Mumbai

The Securities and Exchange Board of India (SEBI) has proposed amendments to its Issue of Capital and Disclosure Requirements (ICDR) Regulations, 2018, including a new framework to resolve lock-in issues for pledged pre-IPO shares and the replacement of the abridged prospectus with a concise, retail-friendly offer document summary, in a consultation paper released on Thursday.

Currently, pre-issue capital held by persons other than promoters is required to be locked in for six months post-listing. However, depositories are unable to create lock-in for shares that have been pledged, leading to compliance difficulties at the time of the IPO — particularly in companies with a large or untraceable shareholder base.

To address this, SEBI has proposed allowing depositories to record such pledged shares as “non-transferable” for the applicable lock-in period, based on instructions from the issuer.

Issuers will also need to amend their Articles of Association to ensure that, in the event of pledge invocation or release, the shares automatically remain under lock-in in the account of either the pledgee or pledger. The regulator said

that non-banking financial companies lending against unlisted shares have expressed agreement with this proposed mechanism, which is expected to simplify IPO execution while protecting lenders' interests.

SIMPLIFIED DISCLOSURES
SEBI has also proposed doing away with the requirement for an abridged prospectus to accompany every IPO application. Instead, issuers will provide a standardised “offer document summary” — a concise and easy-to-understand version of the offer document, containing key business, financial and risk disclosures. “The voluminous nature of the offer document may deter retail investors from reviewing such documents, thereby leading to a lack of engagement and participation in the IPO process, including providing comments on the disclosures,” SEBI said in a draft paper, inviting public comments by December 4.

This summary will be submitted along with the draft offer document and made available on the websites of SEBI, stock exchanges, the issuer, and lead managers. The regulator said the move is intended to make disclosures more accessible to retail investors, many of whom currently rely on informal or unverified sources such as social media or grey-market discussions.

PhysicsWallah IPO booked 1.81x; Emmvee under-subscribed at 97%

Madhu Balaji
Bengaluru

Edtech platform PhysicsWallah Ltd's initial public offering (IPO) was subscribed 1.81 times on the final day of bidding, led by institutional and retail demand.

The qualified institutional buyers (QIB), who had shown muted interest during the first two days, subscribed 2.70 times, while non-institutional investors (NIIs) under-subscribed at 0.48 times, and retail investors 1.06 times. The employee portion was booked 3.49 times.

The ₹3,480-crore IPO came out with a price band of ₹103-₹109 per share. It comprised a fresh issue worth ₹3,100 crore and an offer for sale of up to ₹380 crore by the promoters.

The anchor portion of the issue was also strong, securing ₹1,563 crore.

HNIs give a miss

| | (Number of times) | |
|------------------|-------------------|---------------------|
| | PhysicsWallah | Emmvee Photovoltaic |
| QIB | 2.70 | 1.28 |
| Retail investors | 1.06 | 1.10 |
| Non-institutions | 0.48 | 0.30 |

| Total | 1.81 | 0.97 |

Source: Exchanges

received bids for just 0.97 time or 97 per cent.

QIBs led the demand with 1.26 times subscription, retail investors booked 1.10 times, and the non-institutional investors (NIIs) remained under subscribed at 0.30 times.

The IPO was priced in the band of ₹206 to ₹217 per share.

The total issue size is about ₹2,900 crore, consisting of a fresh issue of roughly ₹2,144 crore and an offer for sale (OFS) of around ₹756 crore.

Sensex, Nifty surrender most gains to close flat

Madhu Balaji
